DETAILED ACTION

1. Amendment and response filed by applicants dated Oct. 10, 2006 have been entered and considered carefully.

Claims 1-47, 49-69 have been canceled. Claims 48, 70-71 and newly added claims 72-80 are pending.

2. *Reason for Allowance*

The following is an examiner's statement of reasons for allowance:

Applicants' presentation that the Villani et al. disclosed wide range limits (1-1000mg) with examples being drawn to 100 mg -200 mg doses, even at divided units, does not render the instantly amended 0.1-10 mg dose range obvious. A survey of the art provided evidence that such argument would have merits. It was evidenced that the Goldman et al. reference provided review of the late dated art that the "optimal" dose for Descarboethoxy- loratadine appeared to be 5 mg once daily (see abstract). Goldman et al. was not available at the time the instant invention was filed. Therefore, one skilled in the art in possession of Villani et al. at the time when the invention was made, without the knowledge of such optimal dosage would not have any motivation to choose the claimed low dose range instead of the considerably higher dosage of Villani et al.

Claims 48, 70-80 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
